

## **The Prague's Petřiny**

### **Abstract**

In this bachelor's work I will pursue development and history of the housing estate Petřiny in Prague. Construction took place between years 1959 and 1969. Main architects were Evžen Benda and Vojtěch Mixa. The dominant building of the Institute of Macromolecular Chemistry of Academy of Sciences of the Czechoslovakia Republik, built in year 1964 by Karel Prager, become a part of this housing estate. In the 90s was thought about finishing of the construction of the estate Petřiny. Between years 1994 and 1998 come into existence compound Hvězda by architect Vlado Milunić. This housing development finishes the estate Petřiny and with the compound Hvězda form general urbanistic's conception.

**Key words:** housing development, estate, housing estate, housing construction, high-rise block, urbanism.
